HIGH-PERFORMANCE MATERIALS · SOURCING + QUALIFICATION

Special Metals. Precisely Sourced.

We qualify special-metal requirements across material, product form, manufacturing route and evidence — before price becomes the decision.

Start with the service condition. Define what must perform, what can actually be made, what evidence must travel with it, and who has authority to release the route.

START TECHNICAL REVIEW ▸

REVIEW EVIDENCE MODEL

MATERIALS

Stainless · Nickel · Low Expansion · Titanium · Zirconium

PRODUCT FORMS

Strip · Sheet · Plate · Bar · Forging · Components

QUALIFICATION

Grade · geometry · origin · inspection · approval

SUPPLY ROUTE

Manufacturing · approved origin · stock + processing

PERFORMANCE ENVELOPE

Service conditions choose the material. Qualification chooses the route.

TEMPERATURE

Cryogenic · elevated

CORROSION

Media · chlorides · acids

MECHANICAL

Pressure · fatigue · strength

STABILITY

CTE · flatness · repeatability

APPROVAL

Standard · origin · inspection

1440 × 1000

STANDARDS

A grade name is not a complete specification.

International sourcing depends on the product standard, product form, condition, dimensions, testing and end-use qualification. The same alloy designation can lead to different supply routes.
